Research Interests

- Quantum algorithms: quantum state-instructed circuits, interesting algorithmic subroutines
- Catalysis in quantum information: catalysis in circuit compilation, state-oblivious catalysis
- Resource theories: resource broadcasting, composition of free state sets and free operations

Research Experiences

PhD Study

with Nelly H. Y. Ng

 Aug. 2021 –  SPMS, Nanyang Technological University

My PhD research focuses on the non-trivial use of auxiliary systems, such as catalysts or states instructing quantum circuits. In my catalyst-related work, I established the ultimate limit of catalysis within specific and generic resource theories. In my algorithm research, I developed a novel framework for quantum recursion with a circuit depth-width trade-off.

IBS Student Trainee, Research Assistant

with Juzar Thingna and Peter Talkner

 Jul. 2020 – May. 2021  PCS, Institute for Basic Science

My goal was to persuade the quantum thermodynamics community to explicitly consider measurement strategies in the operation of quantum thermal machines. I showcased that the appropriate measurement strategy enhances the performance of quantum Otto engines and battery charging processes.

Teaching and Services

Secretary (2023) and Treasurer (2024)

[Quantum Young Researchers Association \(QYRA\)](#), Singapore

 2023 – 2024

- Lead organiser of QYRA X Infocom Media Development Authority (IMDA) event **Careers in Quantum Communications**
- Organiser of **Quantum Energy Initiative (QEI) workshop 2023**
- Topical team member (w/ Masahito Ueda, Gentaro Watanabe, and Ariane Soret) representing one of the five workshop topics: “Fundamental thermodynamics of information” in the **Quantum Energy Initiative (QEI) workshop 2023**—moderated discussions throughout the workshop and presented the outcomes of the team’s deliberations
- Facilitator for the Townhall event **Building Singapore’s Quantum Future Together: A Multi-Stakeholder Townhall on the National Quantum Strategy and Entrepreneurship**
- Organiser (logistics) of QYRA’s End-of-Year event **What’s next for early-career Contributors in Singapore?**

Scientific Adviser for Korean Translation of the book series “for babies” by Chris Ferrie

CHAEKSESANG, Korea

📅 2023–2023

Advised translations for 12 books: Quantum Physics, Quantum Information, Quantum Entanglement, Quantum Computing, Optical Physics, Statistical Physics, Electromagnetism, General Relativity, Newtonian Physics, Nuclear Physics, Astrophysics, and Rocket Science

SINGA Ambassador

Singapore International Graduate Award (SINGA), Singapore

📅 2023 – 2023

Teaching Experiences

- Tutorial Classes for PH1107: Relativity and Quantum Physics, Nanyang Technological University, Singapore, AY22/23, 23/24, and 24/25
- Tutorial Class for International Students, Physics 1, Seoul National University, Korea, AY20
- Organizer/Tutor for Summer Science Camp, Korea Student Aid Foundation and Gyeongsang Girl’s High School, Korea, Jul. 2015
