Research Interests

- Quantum algorithms: quantum state-instructed circuits, interesting algorithmic subroutines
- Catalysis in quantum information: catalysis in circuit compilation, state-oblivious catalysis
- Resource theories: resource broadcasting, composition of free state sets and free operations

Research Experiences

PhD Study

with [Nelly H. Y. Ng](#)

 Aug. 2021 –  SPMS, Nanyang Technological University

My PhD research focuses on the non-trivial use of auxiliary systems, such as catalysts or states instructing quantum circuits. In my catalyst-related work, I established the ultimate limit of catalysis within specific and generic resource theories. In my algorithm research, I developed a novel framework for quantum recursion with a circuit depth-width trade-off.

IBS Student Trainee, Research Assistant

with [Juzar Thingna](#) and [Peter Talkner](#)

 Jul. 2020 – May. 2021  PCS, Institute for Basic Science

My goal was to persuade the quantum thermodynamics community to explicitly consider measurement strategies in the operation of quantum thermal machines. I showcased that the appropriate measurement strategy enhances the performance of quantum Otto engines and battery charging processes.

Teaching and Services

Secretary (2023) and Treasurer (2024)

[Quantum Young Researchers Association \(QYRA\), Singapore](#)

📅 2023 – 2024

- Lead organiser of QYRA X Infocom Media Development Authority (IMDA) event *Careers in Quantum Communications*
- Organiser of *Quantum Energy Initiative (QEI) workshop 2023*
- Topical team member (w/ Masahito Ueda, Gentaro Watanabe, and Ariane Soret) representing one of the five workshop topics: “Fundamental thermodynamics of information” in the *Quantum Energy Initiative (QEI) workshop 2023*—moderated discussions throughout the workshop and presented the outcomes of the team’s deliberations
- Facilitator for the Townhall event *Building Singapore’s Quantum Future Together: A Multi-Stakeholder Townhall on the National Quantum Strategy and Entrepreneurship*
- Organiser (logistics) of QYRA’s End-of-Year event *What’s next for early-career Qontributors in Singapore?*

Scientific Adviser for Korean Translation of the book series “for babies” by Chris Ferrie

[CHAEKSESANG, Korea](#)

📅 2023–2023

Advised translations for 12 books: Quantum Physics, Quantum Information, Quantum Entanglement, Quantum Computing, Optical Physics, Statistical Physics, Electromagnetism, General Relativity, Newtonian Physics, Nuclear Physics, Astrophysics, and Rocket Science

SINGA Ambassador

[Singapore International Graduate Award \(SINGA\), Singapore](#)

📅 2023 – 2023

Teaching Experiences

- Tutorial Classes for PH1107: Relativity and Quantum Physics, Nanyang Technological University, Singapore, AY22/23, 23/24, and 24/25
- Tutorial Class for International Students, Physics 1, Seoul National University, Korea, AY20
- Organizer/Tutor for Summer Science Camp, Korea Student Aid Foundation and Gyeongsang Girl’s High School, Korea, Jul. 2015
