## Work Experiences

Project Officer

with Nelly H. Y. Ng

📅 May. 2025 –

📍 SPMS, Nanyang Technological University

I am employed as a Project Officer between the transition from PhD Student to Postdoc. My projects include hybrid resource theories, Gaussian phase-covariant operations, and complexity lower bound for imaginary-time algorithms among others.

IBS Student Trainee, Research Assistant

with Juzar Thingna and Peter Talkner

📅 Jul. 2020 – May. 2021

📍 PCS, Institute for Basic Science

My goal was to persuade the quantum thermodynamics community to explicitly consider measurement strategies in the operation of quantum thermal machines. I showcased that the appropriate measurement strategy enhances the performance of quantum Otto engines and battery charging processes.
