## Work Experiences

Project Officer / Research Fellow

**with Nelly H. Y. Ng**

 May. 2025 – Jan. 2026 / Feb. 2026 –

 SPMS, Nanyang Technological University

My projects include hybrid resource theories, Gaussian phase-covariant operations, and complexity lower bound for imaginary-time algorithms among others.

IBS Student Trainee / Research Assistant

**with Juzar Thingna and Peter Talkner**

 Jul. 2020 – Aug. 2020 / Jan. 2021 – May. 2021

 PCS, Institute for Basic Science

My goal was to persuade the quantum thermodynamics community to explicitly consider measurement strategies in the operation of quantum thermal machines. I showcased that the appropriate measurement strategy enhances the performance of quantum Otto engines and battery charging processes.
